	Quality: 5.0 Customer Service: 5.0 Value for Money: 5.0	Project: Repair a Garage Door Comments: Their customer service rep quickly gave me a firm estimate and a rundown of the repair work which included a garage door inspection. The technician was able to come out within 2 hrs and was done in fifty minutes. I was going to do the work myself, but for \$100 more than what the parts would cost me, Michael replaced both door springs, both bearing plates and realigned my door tracks. He gladly answered all my questions and taught me a lot about my garage door. Overall, this was a great value Add Your Comments to This Review

The sensor wiring was installed very neatly. However, I would need to remove and re-install the sensor wiring to install Sheetrock or paneling if I finish the garage as it in the way. Installer was professional and did a great job cleaning up. The owner answered all of my questions in a timely manner. I love having a new door with a remote! Add Your Comments to This Review

We quoted a price for replacing the rubber seal on the bottom of the door. When we arrived the retainer that holds the rubber was missing as well. We do not stock that part on the truck so we came back with the additional part to repair. Price quoted was \$135.00 based on 16' door, customer had 18' so an additional \$4.00, total \$139.00. The additional part was \$36.00 for a total of \$175.00. We charged only \$160.00 Customer paid \$21.00 over phone quote.</p> <p>Update Your Comments to This Review</p>

01/16/2014	5.0 Quality: 5.0 Customer Service: 5.0 Value for Money: 5.0	Review by Bob R. in Champlin, MN Project: Repair a Garage Door Comments: Not sure I can do justice to how great John was in 600 characters. Called me (seriously) BEFORE I was off the line with Home Advisor! He was friendly, listened, and offered to come out whenever I wanted. His 31 years of experience shows right away in how he instantly knew what type of door my old 1971 was and how to repair it. The last company to service it in the 90s did not use the proper springs for the balance needed and he made it right. He was quick and skilled (even kindly put up with me watching and asking dumb questions!) Would highly recommend to all. Price was very fair. Add Your Comments to This Review

10/23/2013	5.0 Quality: 4.5 Customer Service: 4.5 Value for Money: 4.5	Review by Victor S. in Golden Valley, MN Project: Repair a Garage Door Comments: They were on time and quick with the install. The new spring(s) make the door roll very quietly compared to before. Tech provided additional feedback on down force settings for the motor. I however, wasn't aware they only take cash or check; that might be something they want to mention up front. I was at work and planned on paying over the phone with a CC and was not properly prepared. My wife was home and ended up paying with a check. It was just unexpected and could have been avoided. He was very detailed in explaining his services and what was covered in the fee and warrantee. The other companies were also pleasant on the phone however Midwest Molding offered more information to me. Since I am not an expert on garage doors I was given information I would not even know to ask for which I found helpful. Add Your Comments to This Review

He was professional, on time and was done within 40 minutes for \$130 to replace the torsion spring. No added hidden fees or attempts to upsell anything. He even took care of fixing something falling apart on my garage door opener without charging extra! The only downside for me, due to limited cash right now, was that he doesn't accept credit cards .. only cash or check. But I knew this before hiring him and am very satisfied despite that.
